FMICS

[FMICS](#) is the ERCIM Working Group conference on Formal Methods for Industrial Critical Systems and is the key conference in the intersection of industrial applications and Formal Methods.

The aim of the FMICS conference series is to provide a forum for researchers and practitioners who are interested in the development and application of formal methods in the industry. FMICS brings together scientists and engineers who are active in the area of formal methods and interested in exchanging their experiences in the industrial usage of these methods. The FMICS conference series also strives to promote research and development for the improvement of formal methods and tools for industrial applications.

FMICS will be held in Antwerp, Belgium on 20-22 September 2023. As in previous years, FMICS 2023 is part of the CONFEST umbrella conference. In addition to FMICS, CONFEST also comprises CONCUR, FORMATS, and QEST, as well as pre and post-conference workshops and tutorials.

Free access to [the online version of the proceedings](#) has been arranged for a period of 4 weeks.

Concerning the COVID-19 epidemic

FMICS 2023 is planned as a physical, in-person event, with some support for remote participation. In particular, we understand that some authors can be prevented from physically attending the conference for a number of reasons. Hence, in a limited number of cases, there will be remote-participation support for speakers and for other participants who are unable to come. Please contact the organizers in such cases.
